

## Press Release

Milan, Italy, May 10<sup>th</sup>2023

### **Eigenmann & Veronelli proudly announces a new commercial agreement with Advanced Energy Materials for the supply of alumina and aluminium derivatives covering Italy, Spain, Portugal, and Turkey**

Eigenmann & Veronelli (E&V), a leading solutions provider of specialty chemicals and food ingredients, and Advanced Energy Minerals (AEM) have entered into a new commercial agreement covering Italy, Spain, Portugal, and Turkey for the supply of alumina and aluminium derivatives. This partnership marks a significant milestone for AEM, providing access to E&V's broad customer base and establishing a strategic partnership that is anticipated to drive growth for both companies in the territory. AEM is a science-focused and innovative company committed to becoming the leading producer of sustainable premium alumina and other aluminium derivatives for the European market. **Mick Adams**, CEO of AEM, expressed his enthusiasm for the cooperation, while **Mauro Avidano**, E&V's Commercial Director, highlighted the benefits of the partnership, citing E&V's customer base and go-to-market capabilities combined with AEM's strong product portfolio.

#### About **Advanced Energy Minerals**

Advanced Energy Minerals (AEM) is one of the few producers of ultra-high purity alumina worldwide. Its current product range comprises a family of alpha and gamma alumina powders, branded as SupALOX®, aluminium chloride hexahydrates, branded as SupACH®, and alpha alumina pucks, branded as SupPUCK®. Its products are manufactured using our novel, patented, low-carbon Chlorine Leach Crystallization Purification (CLCP) process at purities up to 99.999%. AEM is the only alumina producers that manufactures alumina with minimal CO2 emissions.
