

Press Release

Eigenmann & Veronelli expands lubricants portfolio through partnership with Schäfer Additivsysteme

The collaboration brings together SAS's innovative additive technologies and EV's market expertise to drive growth and create value for customers across the Italian lubricants industry.

Pero (MI), Italy, October 1, 2026 – Eigenmann & Veronelli (EV), a leading distributor of specialty chemicals and ingredients, and Schäfer Additivsysteme GmbH (SAS), a German specialist in additive technologies, have entered into a distribution agreement, establishing a strategic partnership for the Italian lubricants market.

The collaboration combines SAS's innovative additive portfolio with EV's strong commercial footprint, technical expertise and established customer relationships across Italy. Together, the companies aim to expand market opportunities and deliver high-value solutions that address the evolving needs of lubricant manufacturers.

*"This partnership further strengthens our position in the lubricants segment and reflects our commitment to bringing innovative, high-performance solutions to the market," said **Paolo Zucchelli, Business Unit Manager, Performance Solutions at Eigenmann & Veronelli**. "By partnering with Schäfer Additivsysteme, we enhance our ability to support customers with advanced technologies, technical expertise and a differentiated value proposition."*

*"For SAS, this agreement represents a major step forward in our ambition to make our additive technologies available to more customers and applications in key international markets. EV is the ideal partner to combine our deep technical expertise in additive chemistry and formulation with strong market knowledge and customer proximity." said **Daniel Beck, CEO, Schäfer Additivsysteme GmbH**. "Our teams bring together extensive know-how in developing innovative and customized additive solutions, supported by strong technical consulting and application expertise. Together, we will leverage these complementary strengths to accelerate growth, open up new opportunities and deliver differentiated, high-performance lubricant solutions that address the evolving technical and regulatory requirements of the Italian market."*

The partnership marks an important milestone in the growth strategy of both companies and reinforces their shared commitment to innovation, customer-centricity and sustainable business development.

EV GROUP

Founded in 1910, Eigenmann & Veronelli Group is an international solutions provider offering a diversified portfolio of high-quality specialty chemicals and food ingredients. Headquartered in Pero (MI), the company operates in more than 45 countries worldwide and has a direct presence in Italy, the Iberian Peninsula, Turkey, the United Arab Emirates and Poland. With consolidated revenues of €338 million in 2025 and over 350 employees, EV is synonymous with effectiveness and efficiency, combining local market knowledge with chemical innovations, and offering a high-quality and diversified portfolio of specialty chemicals and food ingredients as well as tailor-made application, marketing and supply chain solutions, technical and formulation support, and comprehensive regulatory know-how for a wide range of industries.

Schäfer Additivsysteme GmbH

The family-owned company Schäfer Additivsysteme GmbH has been successful in the field of additive chemistry since 2003, supported by a highly qualified team of chemists, laboratory technicians, engineers, and entrepreneurs. As an additive specialist, the company offers a wide range of additive systems as well as customized solutions tailored to the challenges faced by its customers. Through competent and targeted consulting, Schäfer Additivsysteme GmbH supports its customers in the efficient application of additive systems in products used within the plastics, lubricants, rubber, and adhesives industries. Schäfer Additivsysteme GmbH is fundamentally committed to improving sustainability and durability, as its additives significantly extend the life cycle and service life of products. This contributes to reducing waste generation, energy consumption, and ultimately CO₂ emissions.
